

UniMag II

The ID TECH UniMag II is a magnetic stripe reader that easily communicates with mobile devices via the headphone jack. Just simply use your mobile device to read a variety of magnetic stripes - including credit cards, signature debit cards, gift cards, and loyalty cards. The UniMag II allows merchants to provide their customers with another acceptable method of payment, and with the capability to swipe credit cards, merchants can save money by avoiding costly card-not-present fees. The convenient solution allows merchants to quickly accept credit card payments wherever they go.

UniMag II
